The goal of the MURDOCK Study is to learn how our community’s health changes over time. With your help, researchers can make critical discoveries that will help improve the health of future generations.

Completing your annual follow-up form is a major factor in our joint success. Please fill out your form every year, even if your health hasn’t changed. Thank you for contributing to this valuable research!

Contact us to find out when you should follow up and make sure your contact information is up to date.

Stay engaged to help researchers tackle important questions like:

What are the relationships between diet, gut bacteria, metabolism, and chronic kidney disease?

What factors contribute to the body’s changes over time and how functional people are as they age?

How can we better prevent and treat prostate cancer, reduce disease disparities for African Americans, and improve outcomes for men of all races with aggressive disease?

How can we develop safer, more effective treatments for severe acne?

Can online learning help people with diabetes learn to manage their disease and control their blood sugar?

Not a MURDOCK Study participant? Visit us at duketranspop.org to learn about currently enrolling studies.
