RESEARCH RESOURCES

RESEARCH RECRUITMENT RESOURCES

THE DUKE RECRUITMENT INNOVATION CENTER (RIC)
Is recruitment to your research studies a challenge? Do you need help with recruitment planning?

The RIC offers:
• One-on-one consultation services for recruitment and retention planning, from the study design phase through study implementation and rescue
• Tools to assist with recruitment and retention planning
• Tools and guidelines to assist with planning and negotiating budgets for participant recruitment
• Access to technology tools that enhance recruitment within the EHR

REGIONAL CLINICAL RESEARCH DATA RESOURCES

CLINICAL DATA RESEARCH NETWORKS (CDRNS)
Need a rich source of electronic clinical health record data? Want to collaborate with researchers outside of Duke? Could your study benefit from access to more than 30 million electronic health records?

Duke participates in the Carolinas Collaborative CDRN and the Mid-South Alliance/PCORnet CDRN. Both CDRNs use the PCORnet Common Data Model for the underlying data marts which are populated with data extracted from each organization's electronic medical records system.
These CDRNs can:
• Provide counts to assist with cohort discovery and recruitment numbers to support feasibility studies and engagement
• Provide data sets with appropriate approvals to support your study
• Facilitate study collaborator identification within the CDRN member institutions including UNC-CH, Wake Forest, Health Sciences South Carolina, Vanderbilt, Meharry, Vanderbilt Health Affiliated Network, and Greenway Health

Learn more: ctsi.duke.edu/CDRN
Contact: cdrn@duke.edu

Have a question or suggestion related to any of these research and recruitment resources? Contact Jamie Roberts: jamie.roberts@duke.edu  |  (904) 412-4776
DUKE AND NATIONAL DATA RESOURCES

GETDATA@DUKE
Looking for datasets and resources to support secondary analyses and hypothesis generation?

GetData@Duke is an inventory of data sets available to Duke researchers with content, availability, and contact information for a broad range of data sets and resources.
GetData@Duke includes links to:
• Clinical data
• Duke EPIC through DEDUCE
• Other EHRs through Duke's participation in several Clinical Data Research Networks
• Research data
• National data

Do you have a data set or resource you’d like to add to GetData@Duke? Let us know: bit.ly/add-data

NATIONAL TRIAL INNOVATION NETWORK ACCESS

TRIAL INNOVATION NETWORK HUB LIAISON TEAM
Looking for access to the new national Trial Innovation Network?

The Trial Innovation Network (TIN) has linked all 64 CTSA institutions into a single clinical research network ready to engage in multicenter studies using highly efficient processes such as a central IRB and master clinical trial agreements.

The Hub Liaison Team (HLT) serves as the gateway for Duke investigators considering using the TIN.
Services provided by the HLT include:
• Access to resources to assist in planning and study design, including identifying funding opportunities, grant development, informatics, biostatistics, and other services
• Assistance with completion of the TIN proposal submission form
